

About Us

The European Sustainable Nanotechnology solutions Association (ESNA) is an ecosystem that grants access to innovative solutions, empowering the next generation of environmentally friendly plastic and paper products. We are a community offering advanced technologies and crucial business expertise to accelerate the market uptake of your pioneering product.

the next generation of
environmentally friendly
plastic and paper products!*

Partner with us

ESNA community shares know-how among its members to boost their business in environmentally friendly products.

Services at hand

ESNA community offers customer and solution-focused advice to accelerate market penetration of novel products.

ESNA Sales Representatives and Single Entry Point will support you in planning your development, selecting best suited R&D partners, coordinating all interactions with the ESNA partners and accessing funding and investments for your project.

Our Core Services

ESNA supports innovative SMEs and industries by providing expert support from an early development stage to the optimised transformation of prototypes into valuable and innovative products.
